

John Snyder – jsnyd96  
Ryan Milem – gint271  
HW5 Documentation

To run our hw5 solution:

1. Extract the tar package with “tar -xzvf hw6\_gint271\_jsnyd96.tar.gz”.
2. Go to the solution folder with “cd ./hw6\_final”.
2. Run “make”.
4. Run “./CandyClient hostName portNumber” on another terminal, giving it the information of a running server process.
